

## PowerView (My Usage Monitoring)

PowerView is an energy monitoring service for members who want to take a more active role in monitoring daily electric usage.

Member must have a meter number above 50000 (found on your power bill) to sign up to monitor their electricity usage. PowerView will also send an email alert on high usage days. To begin the service, you can use the link below.

**Once you go to [www.myusage.com](http://www.myusage.com) on the internet, click on the myusage monitoring link, select link at bottom “Interested in setting up an account CLICK HERE” and follow these steps:**

- **Step One:** Select Oregon as the state
- **Step Two:** Select Midstate as your provider
- **Step Three:** Enter your email address under the Usage Monitor Account section, not the PowerPay Account section. A validation code will be sent to this email.
- **Step Four:** Retrieve the validation code sent to your email.
- **Step Five:** Create a password.
- **Step Six:** Enter your Midstate account number and meter number (found on your last bill).
- **Step Seven:** Answer the remaining setup questions.

Once you have completed step 1 through 7 you should see your MyUsage home page. The usage is reported daily in the history section, it will take time for the average energy use on the home page to even out. This will even out as more meter reads are pulled into the account.

- **Step Eight:** Click on Settings, Click on Manage Info tab, Change the zip code to the zip at the service address (example: live in Portland, vacation home in La Pine add La Pine’s 97739 zip), click Update. The zip code is used to show the high and low temperatures at your location that you are monitoring usage.

If you want to start a second PowerView account you will have to contact Midstate’s office at 541-536-2126, option 3.
